

## Update on Performance Audit Team restructure

At the last Joint Consultative Committee Meeting the PSA was advised of a restructure of the Performance Audit Team. The PSA delegates sought feedback from members and this and relevant questions have been put to management.

This week we were advised of changes to the Technology Services area. We understand that the proposed changes have been provided to staff and that consultation goes through until 10 December. If members have any issues that you wish the PSA to address with management, please let us know.

Under your award the employer is required to consult with the union. We, in turn, ensure that we support and represent our membership through strong communication and consultation.

If you are reading this and have not joined the union I urge you to do so. If you have queries you can talk to your delegates or the PSA officials who cover the Audit Office. If you are a member already encourage others to join.
