Machinery of Government changes

The recent Machinery of Government changes bring with them an understandable level of uncertainty for staff. The merging of the previous Department of Planning and Environment with the Department of Industry is a massive change, and one that requires consultation with staff and the PSA. PSA delegates and Industrial Staff will be meeting with the new Secretary Mr Jim Betts, as well as other Department representatives, next Friday 24 May to discuss DPIE's new structure and industrial arrangements moving forward.

In order to ensure the meetings are productive and useful, the PSA requests that member questions and feedback regarding anything to do with MoG changes is captured in the following brief survey (found [HERE](#)). Your responses will be kept strictly confidential but are vital to ensure that your union is progressing the issues you want to know about.

Additionally you can email PSA Industrial Officers Nick Player (nplayer@psa.asn.au) or Michael Sinclair (msinclair@psa.asn.au) to provide feedback.
