

SAO Science – Introduction to Science Conferences

As members would know the PSA has been campaigning for better training for SAOs working in Science. The PSA identified the issues around SAOs not being properly trained and supported when moving in to the Science area by working with the SAO Science Advisory Group over the last six months.

The PSA is pleased to see that, in this round of conferences, the Department of Education is running two Science focused courses.

We encourage all SAOs working in science who have not undertaken introductory training to register for these courses. You can register for these courses here:

[Intro to Science Part A \(Chemical Calculations\)](#)

[Intro to Science Part B \(Basic lab techniques & chemical preparation and disposal\)](#)

The PSA is continuing to work with our Delegates and the Department to ensure quality training for SAOs working in Science.

As always the PSA will be there!

We love to hear from our members when we are at conferences, so come and say hi, and if you have any colleagues that haven't joined yet bring them along to the PSA table for a chat.

Two easy things you can do to support your union:

Support the work of the PSA and delegates by asking your colleagues to [JOIN](#) their union.

If SAO Science members you know have not received this bulletin, forward it along to them and ask them to let us know they are a SAO working in Science by emailing membership@psa.asn.au
