1. Introduction

The Environment Protection Authority (EPA) has recently undertaken an external review of the Business and Administrative Support (BAS) functions within the organisation. From this review it is proposed that the EPA undertake a restructure of the BAS operational model to better align to business requirements. The organisational review also has implications for the EPA Finance Unit, Human Resources Unit (Capability and Talent) and Executive Services and Governance Unit. This following Change Management Plan outlines the approach and rationale for the restructure of the BAS functions which has been endorsed by the EPA Board.

2. Background and reasons for the organisational change

2.1 Background

On 12 December 2019, the EPA Board endorsed a restructure of the EPA (excluding BAS functions) to better align the organisation to deliver on its strategic intent. The new operating model considered where work is performed within the organisation, and how that work is performed. On 3 February 2020, the changes to the Executive level structure were implemented, with subsequent changes to staff reporting lines implemented in early March 2020.

The new structure delivered the following:

- Balanced allocation across seven divisions
- Strengthened capacity in key priority areas
- New approach to operations
- Focused approach to governance and planning
- Agility to respond to emerging issues and solutions
- Increased support and connection

A medium-term goal for the realignment was also to establish a supporting structure for enablement. In the first phase, the realignment excluded BAS staff – as an interim measure, reporting lines for BAS staff were lifted to Executive Director level.

An external company Weir Consulting were engaged to conduct a review of BAS functions across the agency, this review was undertaken from July through to November 2020. Based off the findings of this review a restructure of the BAS functions has been proposed.

2.2 Findings of the Weir Review

The review has identified key findings with respect to:

- Consistency
- Process
- Benchmarking
- Structure
- Communication
- Information Storage
- Cluster service provision

Key recommendations of the review included the following:

- Refining the detail and number of administrative role descriptions to create greater consistency across the EPA and clearer steps for career progression
- Updating administrative and business support structures to help support any surge in activity, increased consistency in access to supervisor support and team composition – Consistent approach, arrangements and supporting structure for all divisions
- Improved clarity of focus and accountability, including addressing challenges identified in balancing what's needed at an organisational administration level and divisional administration level

- Opportunities for continuous improvement of systems and process documentation, again supporting consistency and flexibility and mobility across teams, and endorsement across EPA leadership – One EPA – process, approach, mindset and systems

Further details on the key findings of the review are contained in the Executive Summary and associated Recommendations Table (Attachment A).

2.3 Rationale

Following discussions between the EPA Chief Executive, and the EPA Executive, it is proposed that BAS functions be reviewed and restructured to address the recommendations of the Weir Report and align the BAS operational model and staff to better enable the broader objectives of the EPA transformation.

The restructure will be guided by the following principles:

- One EPA – process, approach, mindset and systems
- Consistent approach, arrangements and supporting structure for all divisions
- Flexibility and agility to meet business needs
- Equity of resourcing across the divisions to deliver capability and capacity
- Consistent and connected delivery
- Focus on building people, system and technological capabilities
- Skillsets to match the role and provide career pathways for staff
- Aligned with the characteristics of a World Class Regulator & EPA values

The proposed change meets the Government Sector Employment Act (GSE) and the Public Service Commission's guidelines. A systematic and considered process has been undertaken to inform and develop the change impacts and approach to managing the implementation of changes required, including supporting consultation and staff engagement requirements.

3. To manage Organisational and Operational Change

3.1 A Change Management Plan has been developed to

- Outline the principles and rationale for the restructure of BAS functions;
- Provide a framework for organisational change for the EPA team in the management of this change; and
- Provide transparent guidelines for the management of employees impacted during organisational change including consultation, engagement and support.

3.2 Purpose of the change management plan

The purpose of this plan is to provide:

- Details of the broad scale changes being considered, including which teams and roles are impacted and how;
- An outline of the approach and principles for employee movements to ensure transparency and equitable handling of impacted employees;
- Specific details of the employee support which will be provided and the consultation and communication strategy;
- Any potential risks and mitigation strategies;
- Details of the proposed organisational structure; and
- The proposed implementation schedule.

4. Approval

The EPA Chief Executive and the EPA Executive have endorsed the proposed changes to BAS functions, Finance unit, Human Resources Unit (Capability and Talent) and Executive Services and Governance Units and are supportive of the approach outlined in this plan and the principles for enacting this proposed change. Endorsement has also been given by the EPA Board.

5. Employee communication strategy

The purpose of the employee communication and consultation strategy is to clearly articulate the approach to informing impacted employees about the proposed organisational change, what it means for them, their options and how changes to staffing will be managed under the Change Management Plan.

Consultation, input and feedback will be invited from impacted employees with respect to the proposed team structures and changes. Impacted employees will have multiple channels for engagement and consultation. This feedback and consultation process will be managed by EPA Senior Leaders and collated in conjunction with the People Partner team.

The communications strategy to impacted employees is multi-faceted and will include:

- Leader led communication
- Specific and separate briefing session for impacted employees
- Employees on leave will be invited to meetings and receive same level of consultation
- Option for one on one or small group discussions for those proposed changes unique to individuals or teams
- Provision of supporting materials including the Executive Summary of the Weir Review (Attachment A), Proposed Structures, Role Descriptions, Frequently Asked Questions and Employee Assistance Program information
- Communication via multiple channels for raising questions and providing feedback, including a dedicated email address.

6. Support services

The EPA Chief Executive Officer and change team led discussions will reinforce to staff the benefits, opportunities and support available throughout the change process and ongoing. Staff will be advised and reminded through FAQs, consultation sessions and staff meetings that they should raise any concerns or issues they have with their Director, and they can access the EAP if seeking independent confidential support.

Additional support services can be provided to impacted staff as required throughout this change. The Director can coordinate these initiatives and they may include:

- Professional Counselling Services and Manager Support provided by the Department's Employee Assistance Provider (EAP): AccessEAP. Call: 1800 818 728, email info@accesseap.com.au or use the website (www.accesseap.com.au) to access confidential counselling support on site or by phone.
- Individual advice and support enquiries can be made to line managers, the Executive Team and People Partners.
- 'Build You Career' and 'Resilience and Change' training sessions were offered to all impacted staff delivered by the DPIE Capability and Development team. Training addressed dealing with change, job application skills and interview skills.
- Assistance and tools for identifying interest and preference for roles

7. Union Consultation

The EPA is committed to consulting with relevant unions in relation to any proposed major changes in the workplace that are likely to have a significant effect on employees.

A representative from the Industrial Relations team, within People and Performance, DPIE, will facilitate consultation with the Public Service Association (PSA) and Professionals Australia (PA).

The PSA and PA will be provided with written information on these proposed changes and its impact on employees, for consultation purposes. The proposed timetable in section 16 includes proposed Union consultation dates.

8. Workforce planning needs and impact on services and functions

The proposed new BAS structures will provide increased capacity and capability to enable the teams and the business to meet its strategic priorities. It will ensure an alignment of partnering and engagement with business groups and specialised central functions supporting best practice service delivery.

This new structure and way of working will also ensure streamlined and more efficient and effective delivery across all business groups. It has been designed to create career pathways for administration staff and opportunities to build capability in specialist areas such as Finance, Human Resources and Ministerial and Parliamentary Support.

9. Changes to organisational structure and Stages of Filling roles

In the new structure, that is, in relation to the impacted employees, classifications at the non-executive level within the EPA will remain as 'Environment Officer (EO) Class' Classifications.

The new structure for the impacted group of employees will contain EO Class 2, EO Class 4, EO Class 6, EO Class 7, EO Class 8, EO Class 10, EO Class 11 and EO Class 12 roles respectively.

The designated overall impacted group of ongoing employees have been placed into pools of impacted ongoing employees, where applicable, depending on the current ongoing employees EO Class, type of new role/function applicable and relevant work headquarter location/s. There may be different pools at the same EO Class as per the above. An employee will be in a maximum of one pool only.

Some roles have been identified as having a 'flexible' work headquarters location, meaning the role could be undertaken at potentially one of several work headquarter locations.

- Temporary employees within the impacted group will not be pooled in Stage One and Stage Two, as per section 9.1.
- Current ongoing EO Class 2 impacted employees will be pooled.
- Current ongoing EO Class 3 impacted employees will be pooled together with the current ongoing EO Class 4 impacted employees applying the premise that all current ongoing EO Class 3 employee current substantive salaries are at EO Class 4 Level 1 or above and that the assignment is to an EO Class role.
- Current ongoing EO Class 5 impacted employees will be pooled together with current ongoing EO Class 6 impacted employees, applying the premise that all current ongoing EO Class 5 employee current substantive salaries are at EO Class 6 Level 1 or above and that the assignment is to an EO Class role.
- Current ongoing EO Class 7 impacted employees will be pooled.
- Current ongoing EO Class 8 impacted employees will be pooled.
- Current ongoing EO Class 10 impacted employees will be pooled.
- Current ongoing EO Class 11 impacted employees will be pooled.

9.1 Stages of Filling Roles

Four stages will be followed for the filling of roles for the impacted employees. Stages One and Two will occur concurrently. The designated impacted group of ongoing employees will be placed into pools of impacted employees depending on their current EO Class, type of new role/function applicable and relevant work headquarter locations/s in Stages One and Two.

Roles by Pool	
Classification Pool	Role/s
EO2	Administration Assistant
EO4	Administration Support Officer
EO6	Executive Assistant; Administration Officer
EO7	Executive Assistant Chair & CEO
EO8	Financial Analyst; Finance Project Officer; HR Project Officer; Project Officer; Governance Officer; Senior Administration Officer
EO10	Coordinator Executive Initiatives & Secretariat; Coordinator Fleet & Property; Coordinator Information & Access; Coordinator Ministerial & Correspondence; Coordinator People & Talent; Coordinator Risk & Governance; Finance Business Partner; HR Business Partner; Senior Corporate Accountant
EO11	Executive Officer
EO12	Manager Business Advisory & Partnering; Manager Financial Control & Reporting; Manager People Partners; Manager Strategic Coordination; Manager Risk & Governance

An ongoing employee will be considered for Stage One or Stage Two using the following principles.

9.1.1 Stage One – Direct Assignment to roles for Impacted Employees within pools

The EPA may directly assign ongoing employees into an EO Class they have been pooled into.

Direct assignments will only occur where there are more or the same number of vacant roles in the new pool structure, than ongoing employees impacted within a pool (with respect to EO Class level of the new role, role type/function applicable and work headquarters locations/s).

The assessments standard for Stage One is that employees must: meet the essential requirements of the role as detailed in the role description; and be able to perform the focus capabilities to the appropriate standard as detailed in the role description, as applied to the nature and context of the work to be performed.

9.1.2 Stage Two – Internal Role Suitability Assessment for Impacted Employees within pools

Where there are more impacted ongoing employees than relevant ongoing roles available within a pool, an internal role suitability assessment process will be undertaken.

Internal role suitability assessment will be in line with the Stage Two Assessment Methodology and Review (Appendix C). This assessment will be undertaken by (the) assessment panel/s. Candidates may be ranked accordingly to role/s available (if any) to that specific pool. Employees will be requested to express an interest in ongoing assignment to roles available to their pool at this time.

The candidates will be notified of their assessment outcome prior to Stage Three commencing.

If requested, the convener of the assessment panel will provide feedback to the unsuccessful employees for Stage Two, communicating the reasons as to why they were not assigned to a role. Employees will not be advised of their actual ranking, if they are ranked.

Note: Stages One and Two will occur concurrently. Stages One and Two are the only stages where the pooling system and matching applies.

Eligibility for Stages One and Two

The following people are determined to be eligible for Stage One and Stage Two pooling:

- Ongoing non-executive employees at the relevant EO Class/s within the impacted group.

Noting, when there is no relevant ongoing EO Class role in a pool in the new structure, the ongoing employee cannot be assigned to a pool in Stages One and Two, and as such will be able to apply for available vacant ongoing roles in Stage Three.

9.1.3 Stage Three – Internal Merit Recruitment for the Impacted Employee group.

Any ongoing roles not filled through either Stage One or Two will be opened as Expressions of Interest opportunities through internal merit selection for the EPA impacted group of employees, pursuant to Rule 23 of the Government Sector Employment Rules 2014. The Stage Three process will be consistent with the GSE merit selection process, whilst applying Rule 23. At this stage vacant ongoing roles can be advertised to the EPA impacted group of employees.

Note: At the completion of Stage Three, an ongoing employee may be declared an Excess Employee, when the ongoing employee within the impacted group of employees has not been assigned to an ongoing role within the new structure or secured an ongoing assignment elsewhere in the Public Service.

Eligibility for Stage Three

Eligible employees at this stage are defined as:

- Current ongoing non-executive employees within the impacted group assigned to a role on an ongoing basis in Stages One and Two;
- Current ongoing non-executive employees within the impacted group not assigned to a role on an ongoing basis in Stages One and Two; and
- Temporary employee applying for an ongoing role - If a temporary employee within the impacted group of employees wants to move to an ongoing role, they need to have been comparatively assessed and been employed for 12 months or more, otherwise they will need to wait and apply at Stage 4.
- Temporary employee applying for a temporary role - Temporary employees within the impacted group of employees who were previously assigned to a role based upon a comparative assessment, i.e. after external advertisement can be matched to another temporary role at the same classification regardless of length of employment.

Promotion decisions made through Stage Three, Internal Merit recruitment, may be reviewed applying GSE Rule 24 and 25.

9.1.4 Stage Four – External Advertising

All identified new roles included within the scope of the CMP, unable to be filled via Stages One, Two and Three may be available for external advertising. All EPA staff and the general public are eligible to apply, via a GSE compliant external recruitment process.

9.2 Current Employees

In total 71 employees (55 ongoing; 16 temporary) are in scope of the BAS restructure and have potential impact to their role. Proposed actions for each impacted employee will be mapped following structural consultation in line with the stages for impacted staff detailed in section 9.1

Current Employee Headcount Numbers by grade

Employee Grade	Ongoing Employees	Temporary Employees	Total
Environmental Officer 2	7	1	8
Environmental Officer 3	6	2	8
Environmental Officer 4	11	6	17
Environmental Officer 5	4	0	4
Environmental Officer 6	3	1	4
Environmental Officer 7	2	0	2
Environmental Officer 8	12	3	15
Environmental Officer 9	1	0	1
Environmental Officer 10	6	1	7
Environmental Officer 11	3	1	4
Environmental Officer 12	0	0	0
Environmental Officer 13	0	1	1
Environmental Officer 14	0	0	0
Total	55	16	71

9.3 Current Organisational Structure

Please see Attachment B for the current organisational structure for impacted staff.

9.4 New Organisational Structure

See Attachment D for the new BAS organisational structure.

9.5 Comparison Table (role count not employees)

Current vs. Proposed Structure

Employee Grade	Current Roles			Proposed Roles		
	Ongoing	Temporary	Total	Ongoing	Temporary	Total
Environmental Officer 2	7	1	8	2	1	3
Environmental Officer 3	7	3	10	0	0	0
Environmental Officer 4	13	8	21	22	13	35
Environmental Officer 5	4	0	4	0	0	0
Environmental Officer 6	5	2	7	12	8	20
Environmental Officer 7	2	0	2	1	0	1
Environmental Officer 8	13	4	17	12	4	16
Environmental Officer 9	1	0	1	0	0	0
Environmental Officer 10	7	0	7	9	3	12
Environmental Officer 11	3	1	4	7	0	7
Environmental Officer 12	0	0	0	5	0	5
Environmental Officer 13	2	0	2	0	0	0
Totals	64	19	83	70	29	99

9.6 WHS Implications and Action

WHS implications have been reviewed regarding these changes impacting the safety and health of our team in both the way they work and how and where they work, it has been identified that there are no inherent WHS implications or risks with these proposed changes.

Employee wellbeing is a key priority for the EPA and has been considered in all stages of the change management process. Additional support services will be available to staff as outline in section 6.

10. Risk Assessment and Proposed Mitigations

Risk	Description	Proposed Mitigations
Employee resistance to undergoing further change	Change fatigue	<ul style="list-style-type: none"> Clearly document and communicate the reasoning behind the changes and benefits Comprehensive consultation and communication plan PPC teams to provide support to impacted employees in addition to EAP services
Employees on leave	Employees on leave will need to be consulted	<ul style="list-style-type: none"> Managers to ensure any employees on leave receive invitations to meetings and have access to any formal announcements Managers will need to ensure the same level of consultation is provided to employees on leave
Reduction in morale affecting productivity and service quality	Staff being unhappy with change in reporting lines	<ul style="list-style-type: none"> Broad consultation of changes prior to the implementation Robust communication plan focused on the positive elements of the changes
Drawn out program, impacting staff certainty & project/task delivery	Extended period of uncertainty will impact staff and services they deliver to client agencies	<ul style="list-style-type: none"> Proactive management of program
Senior roles in teams vacant until Stage 3 or 4 implementation	Gaps in key senior roles with specific technical expertise required and important for supporting forming of new teams	<ul style="list-style-type: none"> Sector wide EOI process and sourcing Contractors to commence from announcement to help manage the business continuity risks for delivering the programs of work during BAS implementation.
Drawn out program, impacting staff certainty & project/task delivery	Extended period of uncertainty will impact staff and services they deliver to client agencies	<ul style="list-style-type: none"> Proactive management of program

11. Impact of the restructure on EEO groups

There are no known impact on EEO groups. Any issues or concerns of this nature raised during the consultation process will be considered accordingly.

12. Impact of the restructure on staff with special needs

In the case that an employee with special needs is impacted, all necessary steps will be taken to ensure that the employees needs are taken into consideration during and post consultation. Any issues or concerns of this nature raised during the consultation process will be considered accordingly.

13. Impact on rural communities

All necessary steps will be taken to ensure that any social, economic, environmental, or other consequences of the restructure are taken into consideration during and post consultation. Where possible in the future state roles have been created as flexible in location providing equitable opportunity for those regionally based.

14. Management of excess employees

Ongoing impacted employees may be declared an excess employee if a person has not been assigned to an ongoing role within the new structure by the end of Stage Three. Declaring a person an excess employee will be in accordance with *D2011_007 Managing Excess Employees*. When being declared an excess employee, the person will have the option to choose either a Voluntary Redundancy or Redeployment.

If an Excess Employee chooses redeployment, rather than the Voluntary Redundancy option, case management principles will be adopted in accordance with *D2011_009 Case Management and Redeployment Guidelines*.

15. Management of temporary employees

Temporary employees will not be pooled in Stages One and Two.

Current temporary employees assigned to roles within the impacted group will be able to apply for available vacant roles in Stage Three if they satisfy the eligibility criteria specified in Stage Three (sub-section 9.1.3).

During the transition implementation, current temporary employee arrangements will remain in place, most likely until the contracted end date, depending on the circumstances and roles available in the new structure.

Severance payments may apply in certain circumstances.

16. Timetable for implementation

Action Item	Due Date
Change Management Plan to CEO for approval	Monday, 22 February 2021
